**INDUSTRY
EXPERIENCE**

Watcha, Seoul, South Korea

Jun 2020 – Present

Machine Learning Researcher

- Developed the model to predict users' view-time of the contents.
 - Predict how many people going to watch, how much time people going to watch the content before the content is supplied.
 - Find out which features impact users' watch.
- Developed the pipeline to recognize main actors from the poster & still-cut images.
 - Utilize SOTA face detector & recognizer.
 - Optimize pre/post-processing routines for low latency.
- Developed a novel sequential recommendation architecture to recommend what content to watch next. (In service)
 - Achieve SOTA performance compared to previous SOTA architectures (*SASRec*, *BERT4Rec*).
 - In A/B (online) test (statistically significant p-value < 0.05)
 - **Paid Conversion**: improved **1.39%p**
 - **Viewing Days**: improved **0.25%p**
 - **Viewing Minutes** (median): improved **4.10%p**
 - **Click Ratio**: improved **4.30%p**
 - **Play Ratio**: improved **2.32%p**
- Developed Image Super-Resolution model to upscale movie & tv posters, still-cuts.
 - Optimize the codes for fast inference time & memory-efficiency on CPU.
 - In internal evaluation (qualitative evaluation by the designers), it catches details better & handles higher resolution & takes a little time.
- Working as a full-time.

Rainist, Seoul, South Korea

Nov 2019 – Jun 2020

Machine Learning Engineer

- Developed the category classification model of card transactions, designed lightweight purpose for low latency. (In service)
 - In A/B (online) test (statistically significant p-value < 0.05)
 - ***Accuracy**: improved about **25 ~ 30%p**
- Developed the RESTful API server to serve machine learning model (utilized k8s and open source project).
 - **zero failure rate** (zero 40x 50x error)

- Developed the classification model, forecasting the possibility of loan overdue.
- Worked as a full-time.

% ***Accuracy**: how many people don't update/change their transactions' category.

VoyagerX, Seoul, South Korea Jan 2019 – Sep 2019
Machine Learning Engineer

- Developed speaker verification & diarization models to recognize the arbitrary speakers recorded from the noisy environments.
- Developed a semantic image segmentation model to identify a region of hair.
- Developed an image in-paint model to remove hair naturally from the face.
- Worked as an intern.
